PATIENT IMPROVEMENT

What’s important here?
The patient results detailed on this infographic are mostly MEN, who are MIDDLE AGED and only slightly OVERWEIGHT (BMI>25).

Mean Improvement of All Patients
The red graph represents the percentage of patients who reported >50% relief at various time points after the procedure. For example, at 36 months 70% of patients who responded reported more than 50% relief.

Mean Improvement of All Patients
The blue graph represents the mean reported relief at various time points after the procedure. For example, patients at 12 months may have reported anything from no relief, to 50% relief, to 90% relief the mean of all of those reports was 55% improved.

About This Data
This data analysis is part of the fall 2015 data download of patients who were tracked in the Regenexx advanced registry.

Caution!
This is registry data, which is not the same as a controlled trial. This means it was collected as patients were treated.
